

## **Worksheet L**

**Exercice 1.** Create in your www folder a subfolder L. Create a ex1.html file with the following grid-layout using CSS-Grid so that so it resembles the following screenshot best as possible. The grid should occupy the whole width of the viewport.

Exercice 2. Create a ttt.html file with a 3x3 grid as depicted in the following screenshot. In this exercise we are going to create a template for a tic-tac-toe game. Since we are learning HTML & CSS, we will only focus on the layout and design of the game. The logic of the game we will implement in the following JavaScript course. When the user hovers with the mouse over a cell, it shall be highlighted in red. Hint: use "height:100vi" in the CSS declaration of the grid-container.

## ICT Start – Module 3: Creating static web pages using HTML5 and CSS3

Exercice 3. Download the grid-student.html file from Moodle and modify it so that so it resembles the following screenshot as best as possible.

Header
Link 1 Link 2 Link 3 Link 4

## Left Menu
